

## B.1. Revision of Plan Elements

The West New York Housing Authority will prioritize allocating available Housing Choice Vouchers to extremely low-income households. Extremely low-income households are those with incomes at or below 30% of median income. U.S. Census data included in the 2023 5-Year American Community Survey indicates there were 25,598 total households in West New York, and median income was \$70,389. Of these households nearly 29% have incomes equal to or less than 30% of the median. Further this data indicates there are 18,864 renter households, and 10,386 or 55% of these households are spending 30% or more of their income towards rent.
